DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 11/17/2003 has been considered by the Examiner.

Specification

2. The disclosure is objected to because of the following informalities: On page 1 under "Cross Reference to Related Application", line 2 the phrase "now U.S. Patent No. 6, 682, 476 B2," should be inserted before the phrase "which is a continuation". Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 13-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,482,146 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims in the present application are broader than claims in the patent. Therefore, any apparatus or method meeting the limitations of the patent would necessarily meet those of the claims of the application.

4. Claims 13-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,682,476 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims in the present application are broader than claims in the patent. Therefore, any apparatus or method meeting the limitations of the patent would necessarily meet those of the claims of the application.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Snyders ('134).
